

A woman in a light blue uniform and dark pants is smiling and holding a stack of white linens. She is standing next to a dark grey housekeeping cart filled with stacks of white linens. The background is a blue graphic with circuitry and a globe. The bottom of the image has a brown gradient background with white arrows pointing up and down.

Pinnacle®
Intelligent
Housekeeping Cart
Product Guide

A Motorised Productivity Solution for the Hospitality Industry.

POWERED HOUSEKEEPING CART IMPROVES OVERALL EFFICIENCY

Introducing the **Trust Pinnacle® Intelligent Housekeeping Cart®** range. Our carts are designed to transport with ease, heavy linen supplies in hospitality and health environments. Their powered operation removes the need for manual pushing and manipulation, helping to lessen the risk of strain injuries suffered by hospitality staff. They are particularly effective across carpet, where a conventional cart can be difficult to push.

Trust Pinnacle® Intelligent Housekeeping Carts are available in a range of flexible options and as such are multi-functional offering a wide range of uses

Our easy-to-push motorised carts, reduce the effort needed for housekeeping operations and improve overall efficiency. Their structural foamed construction, enhanced with web molding techniques provides for a strong and durable platform. Smooth surfaces throughout are easy-to-clean. They offer a large storage capacity with adjustable middle shelves. Ergonomic, comfort-grip handles ensure carts are easy-to-manoeuvre, while bumpers on all corners protect walls and equipment from damage.

Our carts are available in four sizes and are ideal for a range of hospitality environments and for operators of varied heights.

- Extensive accessories range provides a complete solution.
- Intelligent control system, easy-to-operate.
- Safe and reliable, to ensure personal and property protection.

HIGH PERFORMANCE BATTERY

Trust Pinnacle® Intelligent Housekeeping Carts feature a high performance battery, which when fully charged, can power a loaded cart for up to 1 to 2 weeks. The carts have a built-in charging protection function. When the battery is fully charged, it will automatically cut off power to ensure safety. At Trust we are committed to the the safe operation of our carts and we work hard to ensure they meet safety regulations.

INTELLIGENT HOUSEKEEPING CART

1 Safety Control System

Trust Pinnacle® Intelligent Housekeeping Carts are enabled with two safety control systems to prevent the cart from running into obstacles:

- » the operator can press the emergency stop button
- » the cart will detect resistance and stop itself automatically to ensure personal and property protection

2 Intelligent Control System

When an operator pushes a cart, the cart will recognise the direction of this force and will move forward automatically. Conversely when an operator pulls the cart, the cart will also recognise the direction of this force and will move backward automatically.

Once the cart starts to move, the operator simply needs to hold the handle with both hands to control the direction of the cart. No strength is needed to push or pull the cart.

- 1 Two types of top shelf are available. The top shelf fitted with dividers is a great place for organising tools. (Carts product code 5071 / 5072 / 5073 / 5074).
